

HELP SPREAD THE WORD ABOUT

Family Connects

You may be the first person to tell your patient about Family Connects, so don't be surprised if they have questions.

You can share the program video, brochure or website to your patients for more information.

Key Topics to Cover with Your Patients

WHAT IT IS

- Family Connects is a free, in-home nurse visit offered to families who deliver babies at participating hospitals.
- Families can use their visit to get support with whatever they need: health checks, breastfeeding support, help scheduling doctor's appointments, getting access to newborn essentials, and much more.

WHO IT'S FOR

- It's for all families! This includes foster and adoptive families, and those experiencing the loss of a baby.
- No need to be a first time parent! Even better if we can offer support for the whole family.

HOW THEY SCHEDULE A VISIT

- Your patient does not have to do anything to schedule.
- A Family Connects team member will schedule a visit while families are in the hospital, or get in touch a few weeks after they get home. It's helpful that they know this call is coming.

Laura L. Sorg, MD, FAAFP
Medical Director, Family Connects Ohio
