THERE IS NO NEED TO WAIT AND SEE

You know your child best. If you have concerns that your child has a delay or disability, talk to your healthcare provider as early as possible. There is no need to “wait and see.”

Early Intervention (EI) supports families with children birth to age 3 who have developmental delays or disabilities so that they have the best possible start in life. EI professionals work with you and your child to identify strengths and needs and address concerns as early as possible with services right where you live, play, and spend your day.
